White Bear Rescue Training Center

Practical Ice Rescue Train-the-Trainer

Join us in beautiful Wisconsin for the Ice Rescue training experience of a lifetime! Our "Practical Ice Rescue" course is a terrific blend of inter-active classroom discussion covering everything from scene assessment and the treatment of hypothermia to options for equipment and on-scene resource management. Water exercises include self-rescue, "GO" and specialty craft rescue operations.

*"It was an EPIC class and weekend!
Jake (WI)*

Trainer class is a practical option for many agencies. It is an intensive 20 hour course. It provides additional Advanced techniques for more challenging scenarios such as unconscious or multiple victim. We work on submerged victim recovery and trauma handling. Trainers even have the opportunity to field test new equipment for leading manufacturers.

We believe that our teaching style is what makes this a unique experience. In the classroom, our trainers receive instruction to improve teaching effectiveness for any rescue discipline, not only for ice rescue technician. We like to say, **"It's not just what we do - It's the way that we do it!"**

*"It's evident you love what you do.
The class is an overall awesome
experience!" Levi (KS)*

Practical Ice Rescue is NFPA 1670 compliant. All equipment is supplied.

Ice Rescue Essentials

Mustang Ice Commander IC9001-03

The Ice Commander™ has a welded nylon shell and removable AirSoft™ foam liner with zip-in upper body and hook and loop connectors in ankles and wrists. Excellent thermal protection and buoyancy. Features include integral chest harness, reflective panels, flexible fleece lined gloves and ice awl pockets on sleeves. Comfortable hood with side zipper for water-tight protection and easy action. Tug-tite™ straps at wrist and thighs for secure fit. Size: Universal Fits: 110 - 330 lbs 4'11" - 6'5" Color: Yellow \$867

*"The suits are great.
Thanks for your awesome service!"
Dave (IA)*

First Watch RS-1000

This handsome, Hi-Vis suit is made with meticulous detailing.

Features: Wonderfully comfortable hood with a range of fit. Tough, textured elbow and knee patches for grip on the ice and protection of suit and rescuer. Gloves are sturdy, flexible and fleece lined. **BOOTS HAVE BUILT-IN STUDS** to improve traction on ice and slush.

Comfortable internal suspenders provide torso adjustment to fit a wide variety of rescuer sizes. Storm flap protects zipper. **NEW** - Second layer of reinforced fabric through the crotch and up to the waist. Plus, velcro **RESCUE** patch on back is removable for customized patch.

Additional features include external harness, pick-pockets, laminated snap-in liner for easy donning and easy care maintenance, thigh adjustment straps and exceptionally nice storage bag.

Size: Universal fits 110-330 lbs 4'11" - 6'5"
Color: H-Vis Yellow/Green \$645

Ice Rescue Essentials

*"The Atlas Sling Rises
above the rest!"
Raven Rescue BC, Canada*

Reach N'Sling A8

The **"Gotta Have"** flotation device for water rescue! It's a buoyant sling, that is adjustable to secure your victim using stainless steel snaphook and ring for closure. High tensile webbing. It can be opened up to become a six foot reach aid. Try that with a ring buoy!

Used by the USCG!

Excellent tool for training and hazardous rescues. Kit includes NFPA certified water rope, speed knob Ice Screw and 2 stainless steel snaphooks. \$99

Speed knob Ice Screw A6-S

Grivel Speed Knob handle provides rapid action when establishing anchor point.

\$60

Rapid Deployment Craft

The RDC

The Oceanid Rapid Deployment Craft, the RDC, is the safest, most durable, fastest deploying rescue craft we've ever used.

Built Rescue Tough!

ICE - Whether propelling the RDC by foot, ice picks, fins or paddles, the rescuer is always safe. It's ultra-buoyant with 2000 lbs of flotation. So stable you can walk anywhere including on the pontoons. No other craft works like the RDC to protect the rescuer from broken ice and frigid water.

"We made our way to the victim with the RDC and got him to shore. Thank you for the training and the RDC. It more than paid for itself yesterday!" Dell (WI)

Floods and Debris - The RDC is an excellent response vessel. It can easily handle multiple victims, while it provides protection from floating debris. It is light weight, easy to transport and can be carried to the disaster area without the need for an established launch site.

"The RDC was absolutely perfect for the conditions. Not sure what we would have done without it."
Steve (WI)

Rapid Deployment Craft

Snowmobile/PWC

The RDC tows like a dream behind your snowmobile or personal watercraft. Only 50 lbs with a 48" track area, it "floats" high on snow or water carrying patients or equipment. Tow shields sold separately.

Swiftwater/Low Head Dams

Here's where the RDC shows its white-water heritage and advanced design. Its tough, abrasion resistant fabric and open floor allow it to ride over rapids and pull right into the pour-over of low head dams. It is a 100% self-bailing boat, capable of facing the chaotic water of the "Killing machine" of hydraulics.

Specifications

Materials - PU/PVC polyester alloy & welded seams	
Length - 15 ft 4"	Width - 48"
Tube diameter - 12"	Floor length - 8 ft.
Access Holes - 22" X 40"	Weight - 50 lb
Buoyancy - +2000 lb	5 Year Warranty

Deployment

The deflated RDC fits a 15"X20"X35" 4-handle case. Carry it to the site then inflate it in about one minute with a standard SCBA bottle
